

CONFERENCE ANNOUNCEMENT

TALL BUILDING MODELING GUIDELINES AND DESIGN CRITERIA

AT NEW LOCATION!
FIFTH FLOOR CONFERENCE FACILITIES
FEDERAL RESERVE BANK OF LOS ANGELES
950 SOUTH GRAND AVENUE AT OLYMPIC BOULEVARD
LOS ANGELES, CALIFORNIA

FRIDAY, MAY 9, 2008
12:00 TO 5:30 PM

The LATBSDC 2008 conference will focus on nonlinear modeling issues related to the analysis and design of tall buildings. The current CBC and IBC building codes are not tailored to tall buildings and, as such, may impose many prescriptive requirements that make the design of tall buildings difficult and economically challenged. The 2008 Edition of the LATBSDC Alternative Design Criteria will be presented. The Tall Building Initiative being coordinated by the PEER Center is spearheading many of the studies that will lead to more rational Performance Based Earthquake Engineering design procedures and an update on these efforts will be highlighted. PEER parametric case studies on tall building will also be presented.

The participants will receive a copy of the 2008 Edition of the LATBSDC Alternative Design Criteria and the joint PEER/ATC report on the subject.

=====REGISTRATION FORM=====

TALL BUILDING MODELING GUIDELINES AND DESIGN CRITERIA

MAY 9, 2008
